### ABOUT ME

MERN & Next.js Full Stack Developer with a proven record of building scalable, high-performance web applications. Skilled in designing dynamic UIs, optimizing APIs, and deploying cloud-based solutions on AWS. Completed MCA, bringing a blend of technical expertise, problem-solving, and a passion for delivering impactful, user-centric digital products.

### WORK EXPERIENCE

#### ARCHITECTUS BUREAU

2022-NOW

Software Developer

- Built and deployed 3+ responsive, high-traffic web applications using MERN stack, ensuring smooth performance and enhanced mobile responsiveness across devices.
- Designed and implemented reusable UI components in React.js, Next.js, and Shadcn UI, with SSR support for improved SEO and performance.
- Developed and maintained secure, scalable RESTful APIs using Node.js and Express.js.
- Maintained and optimized database schemas in MongoDB, enhancing data retrieval efficiency.
- Deployed backend services using AWS Lambda and frontend apps via AWS Amplify, enabling serverless architecture.
- Versioned and collaborated on codebases using Git and GitHub, following best practices in team workflows.
